OBJECTIVE

Computer Science student seeking an OJT position in software development. Interested in full-stack development and backend systems. Experienced in building end-to-end applications, including web applications, automation tools, and data processing pipelines using Python, React, and modern web technologies.

EDUCATION

BS Computer Science

Cavite State University - Main

Sep 2023- 2027

SKILLS

- **Languages:** JavaScript (TypeScript), Python, Dart
 - **Frontend:** React
 - **Backend/DB:** Supabase (PostgreSQL), MySQL
 - **Tools:** Git, Playwright, BeautifulSoup, EbookLib, WeasyPrint
 - **Other:** Web scraping, data processing, EPUB/PDF generation
-

PROJECTS

Wais Wallet — Finance App

React, TypeScript

- Built budgeting app with pockets, expenses, and savings tracking
- Implemented charts for expense visualization

Webnovel Extractor — Content Pipeline Tool

Python, Playwright, BeautifulSoup

- Built pipeline to scrape, clean, and structure web novel content
- Supports dynamic (JS-rendered) and static sites
- Compiles output into EPUB with TOC, metadata, and formatting
- Includes EPUB to PDF conversion

UniQuest — Mobile Productivity App

Flutter, Dart, Supabase

- Built gamified task tracking app for students
 - Implemented missions, rewards, and backend sync
-

ADDITIONAL INFORMATION

- Built and completed multiple end-to-end applications independently
- Experience handling real-world messy data (HTML scraping, cleaning pipelines)
- Experience debugging and iterating on full projects from start to completion
- Comfortable reading documentation and integrating third-party tools
